Tech Team report to AWSC

First I would like to discuss the renaming of the Website Coordinator position to the Technology Coordinator

In 2001 there was a motion to eliminate the Program Coordinator position and to create the position of Website Coordinator. I am not clear on whether a motion is needed for this name and job description change that I am proposing. I would like to ask this body if there would be any objection for me to use the new terminology before an official motion is made?

The BIG project shaping up currently is the conversion from an email alias system to a full Google Workspace account process. I hope to have all AWSC members signed into their “position” accounts by the end of the year. As soon as this is completed we will “pull the switch” to fully activate these accounts. I am planning on having Zoom workshops regarding these accounts soon after they are fully functional.

I am also well aware that there will be a need for one-on-one training and am open and happy to accommodate all of our AWSC membership.

I am preparing to add a Contribution form to the website that will be activated when the Area Assembly has a non-profit PayPal account in place.

GW

Panel 60 Website Coordinator / Technology Coordinator
